

Gabriel Louis Tan

Software Developer | Richmond, BC

Open-minded Computer Science graduate looking to start a software engineering career where I can learn professional skills in software development and design. I am especially looking for mentors who can refine and expand my developer skillset.

Skills

- Translate UI mockups using modern JavaScript frameworks
- Comfortable working in a fast-paced environment (MVP framework)
- Experienced in closely-working with teams of 4-6 developers
- Constantly updated in software design patterns / best practices
- Review and test new functionalities and provide feedback
- Independently resolve bugs effectively, reliably, and timely manner
- Self-studies new technologies during free time

Experience

Mediacast Digital Group Inc.

Web Developer I | Sep. 2021 - Present

- Developed an entire website using WordPress and React
- Implemented custom post types for new website structure
- Integrated Frontity framework for headless frontend
- Worked with Marketing team and Graphic Designer

BotBros AI Cloud Solutions
